

MILLIARDI ENERGO ENVIRONMENTAL MANAGEMENT REPORT

ABOUT THIS REPORT

Milliardi Energo illustrates our efforts to advance our nonfinancial, financial performance regarding environmental management to promote greater economic, social and environmental sustainability in regions we work in. It is in our mission to provide environmental stewardship, openness and honesty, strong community partnerships and an engaged and solution-driven workforce through our business endeavors.

Environmental Management

Milliardi Energo seeks internal and external perspectives to identify, understand and consider the risks and laws associated with new and old issues/regulations and standards in the area of environmental management.

Commitments

- Reduce spills and releases
- Minimize wastes
- Promote water management
- Conservation and biodiversity

Aims

- Develop a consolidated Environmental Management Program Standard to drive more consistent, regular evaluation and implementation of measures to reduce emissions, water use, waste and spills.
- To reduce air emissions from drilling.
- Pursue alternative water sources and review available technology to enable water reuse.

Focus

- Identify and prioritize significant emission sources, and evaluate and implement emission reduction projects for these sources.
- Implement Environmental Management Program Standard
- Develop and implement an improved environmental compliance assurance system and tools.
